ABSTRACT

A national survey of 3,351 high achieving high school students (junior and senior level) was conducted. All students had A or B averages. Topics covered include lifestyles, political beliefs, violence and entertainment, education, cheating, school violence, sexual violence and date rape, peer pressure, popularity, suicide, drugs and alcohol, sexual behavior, quality of life and home, and relationships with parents. The survey questions are part of a database accumulated over 25 years. Highlights of the results included the following: (1) 58% of the students said that it was easy to obtain test answers and questions, 47% and 53% felt that it was easy to obtain drugs and alcohol, respectively, and 19% said that weapons were easily acquired at school; (2) 76% of students admitted they had cheated in school; (3) 37% of students who were sexually active said they would engage in sexual intercourse even if a condom was not available, 44% of sexually active students said they regularly did not use a contraceptive device, and 85% of the sexually active students did not believe that they were at even moderate risk for contracting AIDS; (4) 45% of high achieving males said that they owned or had access to some kind of gun; (5) one-third of students (33%) said their parents knew they had friends at home when they were away, 15% said their parents knew they drank, and one in ten (10%) said their parents knew they cheated in school; and (6) nearly 29% of students knew someone who had allegedly been date-raped, while 11% of female students reported having been sexually assaulted in some manner. Introduction

This survey was conducted by *Who's Who Among American High School Students*, Lake Forest, Illinois, during the spring of 1995 for the purpose of determining the attitudes of student leaders in our nation's high schools. It is the largest independent sampling of this segment of the student population taken annually and this year marks its 26th anniversary. *Who's Who* believes that, in these rapidly changing times, it is important for the nation to be aware of students' opinions and attitudes. Today's teens are an important segment of the present voting population. Hopefully, as the data from this 26th national survey is circulated and studied, significant trends will be uncovered.

We regard this survey as an educational experiment. We are in no way attempting to promote or negate any political, moral or social philosophy, organization, firm or individual. Because of our contact with student leaders, we believe we are in a position to gather important facts and meaningful information and, therefore, have a corporate responsibility to conduct this survey.

Although we of *Who's Who* feel that some of the questions and answers are of a private and controversial nature, we do not hesitate to take the responsibility for the project in order to achieve our objective of identifying and measuring students' attitudes. We apologize to anyone offended by any of the material presented herein.

Though by no means a reflection of today's "average" student because it is dealing with the opinions of student leaders and high achievers, we feel this survey does give insights into the thoughts of those leaders who set standards and behavior patterns for others to follow.

Of the nearly 750,000 high achievers featured in the 1995 edition of *Who's Who Among American High School Students*, 7,500 students were sent the survey and 3,351 completed questionnaires were returned.

These 3,351 responses form the base of the survey. All students surveyed were members of the junior or senior class during the 1994-95 academic year. They were selected for recognition in *Who's Who* by their principals or guidance counselors, other faculty members, national youth organizations or the publishing company because of their high achievement in academics, activities, community service, athletics or their performance in national scholarship or award contests.

The students listed in the 29th Annual Edition of *Who's Who* represent just over 6 percent of the 12,000,000 students who were in high school during the 1994-95 academic year. They represent approximately 18,000 of the 22,000 public, private and parochial high schools in the nation.

This survey was tabulated by computer. Questions were tabulated by total response; breakdowns by sex, race, type of school attended and type of community are also included. On questions calling for write-in answers, results are shown of the most frequently mentioned answers.

FACT SHEET
TWENTY-SIXTH ANNUAL SURVEY OF HIGH ACHIEVERS

- **The 26th Annual Survey of High Achievers** is a representative sampling of the opinions, attitudes, feelings, and concerns of approximately 750,000 outstanding high school students featured in the 29th annual edition of *Who's Who Among American High School Students*.

- Nearly 8,000 students were demographically selected to participate in the survey from the students featured in the 1995 edition of *Who's Who Among American High School Students*. Nationally, 3,351 students completed and returned the questionnaire.

- **The 26th Annual Survey of High Achievers** is the largest independent sample of outstanding high school students. It provides a penetrating look into the minds of those students who are traditionally expected to be among this country's leaders in business, government, and academia.

- The survey questions are part of a database spanning more than twenty-five years. They are developed as a result of the input of students, distinguished educators, and counselors from across the country. The questions present a broad set of thought-provoking topics, including education, careers, sex, violence, drugs, and social issues.

- The results of the survey are tabulated by computer and are broken down by sex, race, type of school, and type of community.

- Other surveys are conducted throughout each year as a public service on timely issues of national concern, such as AIDS after Magic Johnson announced he had contracted the HIV virus, race relations after the Los Angeles riots, and community service around the introduction of President Clinton's national service plan.

HIGH-ACHIEVING TEENS CHEAT THEMSELVES OUT OF CHILDHOOD

Top Teens Choose Vice Over Virtue

Parents Follow "Don't Ask, Don't Punish" Policy

LAKE FOREST, IL — Imagine a world where the lines between right and wrong have been blurred, a world where cheating is acceptable, drug and alcohol use is common, and personal safety is a relic of the past. This is the world in which today's teens, even the high-achievers, live. This is a world where the moral compass is askew.

America's top teens identify "decline of social and moral values" as today's greatest national crisis, as well as the biggest problem facing their own generation.

In fact, according to the **Who's Who Among American High School Students' 26th Annual Survey of High Achievers,** adults and adult institutions have made it possible — and in some cases, have given their silent approval — for teens to engage in risky behaviors and take less than virtuous detours on the road to academic and social success. Yet, despite the turbulent world in which they live, most of these high-achieving teens report they live in happy homes.

"When even the best and brightest students find that the road to temptation is also the path of least resistance, we've got a problem," said Paul Krouse, publisher of *Who's Who Among American High School Students.*

CRIMES AND MISDEMEANORS . . .

- **EASY ACCESS: Students admit it is easy to obtain test questions/answers (58%), drugs (47%), alcohol (53%), and weapons (19%) at their school.**
- **SEX: Over one-third (37%) of those who are sexually active would engage in sexual intercourse even if a condom were not available.**
- **CHEATING: Three out of four (76%) students admit they have cheated.**

WITH NO PUNISHMENT . . .

- **SEX: Eighty-five percent of students who are having sex refuse to believe they have even a moderate risk of contracting AIDS.**
- **CHEATING: More than nine out of ten students (94%) were not caught when they had cheated and 5% were caught but not punished.**
- **PARENTAL CONSENT: One-third of students (33%) say their parents know they have friends at home when they are away, 15% say their parents know they drink, and one in ten (10%) know their children cheat in school.**

THERE'S NO PLACE LIKE HOME

Remember Friday nights, when teenagers across the country anxiously awaited their dismissal from the dinner table — their cue to begin the weekend festivities outside the home and away from their parents' watchful eyes. Today's teens don't mind being home. And, it's no wonder. Home is where they have the most fun. An overwhelming two-thirds (64%) of those who have sex do so at home when their parents are away, and roughly 80% of students who drink do so at their parents' or friends' houses when the parents are away.

Perhaps most surprising is the fact that parents often know about, and give their consent to, these behaviors. One third of parents (33%) know that their kids have friends at home when they are away. Fifteen percent (15%) of students have parents who are aware of their drinking. In fact, many of the students who drink do so with adult permission: 28% in their parents' house with their knowledge and 22% in their friends' houses with their parents' knowledge. So much for insisting on a parental chaperone when your child is at a friend's house.

This permissiveness has not gone unnoticed by the teens themselves. Only 13% say their own parents are very strict, while at the other end of the discipline spectrum twice that number of students (26%) say their parents are not very or not at all strict. Of those who consider their parents to be strict, 82% say "restrictions on extracurricular activity" is the form of punishment most often imposed — "loss of some privileges" was the number one answer among all the students surveyed (50%).

Given this tendency toward light punishment, it is not surprising that even when the students are sanctioned, it is not much of a deterrent. More than half of students (54%) admit that they have repeated activities such as lying to parents, drinking and driving, breaking curfew, getting a speeding ticket, and earning detention after previously being punished for the same behaviors.

"Adolescence is a time to see how far you can push the boundaries, and how much you can get away with. If today's teens are not punished when they do something wrong, or challenged to take their responsibilities more seriously, then their resulting poor attitudes and bad behaviors are only partially their fault. How many adults do you know who would always do the 'right' thing if they hadn't been taught about the consequences of their actions? I don't know many," Krouse said.

TO CHEAT OR NOT TO CHEAT? WHERE CAN I FIND THIS ANSWER?

Parents aren't the only adults who have not been able to teach these teens that actions have consequences. Teachers also seem to be too easy on them. An overwhelming majority of the students (70%) find their school to be only somewhat or not very challenging. And it shows. More than half of high-achievers (54%) spend only seven hours or less a week on studying.

When they can't make the grade with this minimalist approach, how do these kids keep up? By cheating. Roughly nine out of ten (89%) go to a school where cheating is common, and over half (58%) say that it would be easy to obtain test questions or answers at their school.

It should be no surprise then that three quarters of high-achievers (76%) themselves admit they have cheated on their schoolwork: 66% confess to copying someone else's homework and 39% admit to cheating on a test or quiz.

-MORE-

Who could blame them when the consequences of cheating are almost non-existent? Almost all students (94%) who have cheated were not caught, and others who were caught were not punished (5%). It's no wonder that two-thirds of those who cheated (66%) did so because it didn't seem like a big deal.

"Unfortunately, cheating isn't the only vice these students find in their schools. In fact, cheating is the lesser of the many evils lurking in school halls," Krouse said. Drugs (47%), alcohol (53%), and weapons (19%) are all deemed "easy or not very difficult" to obtain at school. A shocking 42% also report drug dealing at their school.

Drinking and drunk driving are no less common among today's students: 80% of students say there is a lot of alcohol use among students from their school, and one-third (33%) say driving under the influence of alcohol or drugs is very common. In fact, one in ten (11%) *Who's Who* students admit they have driven after drinking and more than one in four (27%) have been passengers in cars whose drivers had too much to drink. They do, however, learn from the mistakes of others: only 4% of those who know someone who has been badly injured or killed in a drunk driving incident have gotten into a car with a drunk driver.

NO SAFETY IN THESE NUMBERS

In school, where weapons and illegal substances are so easy to obtain, the Dodge City mentality has taken its toll on the security of many top students. Roughly one in ten (12%) students have felt unsafe at school. Just over one quarter of them (28%) know someone who has brought a weapon to school and almost half (45%) of high-achieving males claim to own or have access to some kind of gun. Roughly one in seven (14%) would have no problem getting their hands on a semi-automatic weapon.

"Given the charged and dangerous atmosphere that these adolescents grow up in, it is no wonder many of them can't handle the pressure. Unfortunately, suicide has become the last fatal choice for far too many of them," Krouse said. Over one quarter (26%) have considered committing suicide, and 4% have actually attempted it. Almost half (45%) know someone their age who has tried to take his or her own life and 17% know someone who committed suicide.

Sexual assault is another form of violence with which these top teens are all too familiar. Almost one-third (29%) know someone who has allegedly been a victim of date rape. Eleven percent (11%) of female students have been sexually assaulted in some manner and 4% have been raped.

With dangers lurking at every turn, it is no wonder teens take risks with startling regularity. Despite the countless messages that tell them otherwise, today's teens are not afraid of the consequences of unprotected sex: almost half (44%) of sexually active students do not use a contraceptive device regularly, and over one-third of them (37%) would engage in sexual intercourse if a condom were not available. Eighty-five percent (85%) of students who are having sex refuse to believe they have even a moderate risk of contracting AIDS, and 61% percent are convinced that their risk of pregnancy is low or nonexistent. Despite this unwarranted confidence and sense of invulnerability, almost half (44%) regret their decision to have sex and wish they had remained a virgin.

-MORE-

A LITTLE POSITIVE REINFORCEMENT CAN GO A LONG WAY

Somehow, life isn't all bad at the top. Despite all the stresses and dangers surrounding them, these teens lead relatively happy lives. One arena in which they are particularly happy is in their home. While their own parents may not realize it, most of the *Who's Who* respondents have a great deal of respect for them. Roughly two-thirds (69%) say they come from homes that are "happy and close most of the time." An overwhelming number of them (83%) have a great deal of confidence in their parents, a level that far exceeds their confidence in other institutions such as the media (4%) and their school (35%).

Two-thirds of the students give their parents the greatest compliment a child can give: 67% plan to raise their own children the same way they were raised. And, these top teens have been raised to keep their priorities straight. Almost four out of five students (84%) would rather be valedictorian than homecoming king or queen, 82% would rather be voted most likely to succeed than part of the "in-crowd," and 85% are happy with their level of popularity.

These high-achievers have clearly inherited their well-adjusted attitudes from their parents: 95% of the students think their parents would rather they be valedictorian than homecoming king or queen and nine in ten students (91%) believe their parents are happy with their level of popularity. It's no wonder, then, that only 10% of them admit they have compromised their relationship with their family to be considered more popular.

Despite this tremendous respect for their own families, the students blame the family as an institution for many of the problems plaguing society. Parental apathy was the number one explanation given for the level of violence in their schools.

"When children reach the teen years, adults often feel their responsibilities are over. But these teens are telling us that's just not the case. They need our help to make the right decisions, our guidance and our discipline when they make the wrong choices, and our involvement in making their schools and environments safer. When we grew up, we didn't have to go it alone. Why should they?" Krouse said.

The *Who's Who* annual survey is conducted among 3,351 high-achieving 16- to 18-year-old students all of whom have an "A" or "B" average, and 98% of whom plan to attend college after high school graduation. The survey asked about school life, sexual activity, social issues, study habits, drug and alcohol use, and teen suicide.

PAUL KROUSE

Paul Krouse has been involved with teenagers and the issues that concern them for twenty-nine years. As the publisher of *Who's Who Among American High School Students* and *The National Dean's List*, the two largest publications in the nation honoring high-achieving high school and college students respectively, he has become a national expert on teen behavior and attitudes.

Krouse has conducted twenty-six annual surveys of *Who's Who* students — the nation's largest, most comprehensive independent sampling of high school students' opinions — asking students their views on issues such as education, sex, AIDS, drug and alcohol use, and suicide. From that opinion research he has learned what teens think, what they want, and what they need. He has used this information to provide helpful advice to parents identifying the problems facing teens and offering solutions through his syndicated radio commentaries, "Straight Talk on Teens."

Over the years, Krouse has appeared on major radio programs including *National Public Radio's "Morning Edition"* and *"The Michael Jackson Show."* His national television appearances include *CBS "Up To The Minute"* and *ABC "World News Now."* Results from *Who's Who* surveys have appeared in almost every major paper across the nation, including: *USA Today, Washington Post, Los Angeles Times, New York Times, Detroit News,* and *Boston Globe.* The survey results have also been the subject of national television programs including *NBC "Today Show," ABC "American Agenda,"* and *CNN "Headline News."*

Who's Who Among American High School Students is a recognition and service program published by Educational Communications, Inc. (ECI). For 29 years, *Who's Who* has recognized high-achieving high school students nationwide and continues to serve as a reference for groups and institutions interested in student achievement.

The nearly 750,000 high-achieving students listed in the 29th Edition of *Who's Who* represent approximately 18,000 of the 22,000 public, private and parochial high schools across the country.

Public, private and parochial high schools are invited to nominate students who have achieved a 'B' or better grade point average and demonstrated leadership in academic areas and extracurricular activities.

There are no charges to students or sponsors contingent upon this recognition award.

Since 1978, the ECI Committee on Ethics, Standards & Practices, comprised of distinguished educators, has advised ECI on educational services and the content and policies of the directories.

Programs and services made available to recognized students:

- Scholarships
- College Referral Service
- Grants-In-Aid Program
